Capt. William L. Cary, Reports Officer, Secretariat, OSS, Washington, D. C.

CM: Chief, Pacific Coast Area, OSS, San Francisco, Calif.

UBJECT: Monthly Report of Pacific Coast Area Activities, August 1945.

A. GENERAL:

2. Special Funds.

The attached report of the Special Funds officer shows otal expenditure of $2,048.65 chargeable against the fiscal r 1944-45, and a total of $5,241.11 chargeable for the fiscal ar 1945-46.

3. Research and Analysis Branch.

The energies of this branch were directed primarily to the forwarding of files to Washington. Some material on Korea, a report on the attitude of the Netherlands East Indies, and a bit of information concerning the quarrel between the Netherlands and Australian governments, were submitted to Washington.

4. Survey of Foreign Experts.

All interviewing relative to directives on hand were terminated during the month of August, and the staff applied itself to the transmission of appropriate files and records to Washington. Bound volumes of index slips on persons who have knowledge of countries, commodities, industries, transportation, etc., were presented to the San Francisco Office of Military Intelligence for use by that agency and the Office of Naval Intelligence. The S.F.E. branch serviced 24 governmental intelligence offices and agencies during its ten-month period of operation in the Pacific Coast Area.

5. Foreign Nationalities Branch.

This branch was officially terminated during the month of August, and the appropriate files have been forwarded to Washington.

6. Schools and Training Branch.

The final report of Schools and Training reflects that 910 men were trained for OSS during the period, 10 July 1944 to 29 August 1945. This figure includes a special group for FEU and a group for Maritime Unit. The last class was concluded on 28 August 1945.

7. Station FBQ, Reseda.

During the month of August 14,030 intercepts were recorded by this branch. This is a considerable decrease over the month of July.

SECRET

Los Angeles Office.

This office devoted its time largely to the details of ...ion, and all files were forwarded to Washington except ...nt administrative files which will be retained until final ...ing. No overseas shipments or personnel was handled. The ...portation Section was kept busy with movements of students ... training personnel from this area to the East.

9. Field Photographic.

Four 16 mm colored film subjects were completed and distributed as directed during the month.

10. Seattle.

Two reports were submitted by this office to Washington during the month. Considerable work was done toward the closing of the Seattle office.

11. OSS/CASA Outpos t.

Demands on this unit declined rapidly during the month and activity virtually ceased by the end, as CASA officers were shipped to the theater. A recommendation was made and approved that the Outpost be terminated. Plans for the closing were immediately instituted.

12. MO Branch.

The final half-hour program (#124) of a timeless nature was produced by Green's Project on 11 August because the situation from a black radio standpoint was too confused to warrant continued delayed broadcasts. Thereafter three transmissions were made over newly acquired shortwave facilities for immediate use. Program broadcasts ceased 14 August. At present the personnel are producing valuable analyses of trends in Japan. Pursuant to the order to close the studio has already been dismantled.

Several mobile demonstrations on the Bonanza Project at CASA were held during the month.

Respectfully submitted for Lt. Col. Stewart C. Johnson, Chief, Pacific Coast Area:

L. A. DETHLEFSON,
Lt. (jg), USNR,
Executive Officer.

Col. Edward W. Gamble, Jr.,
Executive & Liquidating Officer,
Office of Strategic Services,
25th & E Streets, N. W.,
Washington 25, D. C.

Dear Colonel Gamble:

Your letter of 13 September addressed to Lt. Col. Stewart C. Johnson concerning the liquidation of the Pacific Coast Area was received today. Col. Johnson is on a closing out trip in the southern part of the state this week and upon his return will submit a report to you. Briefly, I can say that we are making good progress in the termination of OSS activities out here.

It was a pleasure to see your signature on a letter again. It brings pleasant memories of our association in France.

Sincerely,

Lloyd Dethlefson

L. A. DETHLEFSON,
Lt.(jg), USNR,
Ex. Officer, Pacific Coast Area.

Mr. Barnes

Dear Colonel Johnson:

You undoubtedly are familiar with Special Order No. 44, Supp., of 5 September 1944 appointing me Executive and Liquidating Officer.

General Donovan, by a letter dated 25 August 1945, addressed to the Bureau of the Budget, has outlined the policies which will be followed in liquidating OSS. I have enclosed a copy of that letter which is self-explanatory.

To the end that I may be informed as to the steps taken to effectuate the policy expressed in the Director's letter, I shall appreciate receiving a statement from you as to the plans you have for your office and the West Coast.

Edward W Gamble, Jr.
Executive and
Liquidating Officer

MEMORANDUM

TO: Chief, Procurement and Supply Branch

FROM: General Counsel

SUBJECT: Termination of Santa Catalina Island Leases (OSS-1090 and OSS-1105)

1. As you are aware, the existing leases between OSS and Santa Catalina Island Company, covering seven separate parcels (including Buttonshell Beach, leased under OSS-1105), have been terminated, effective 30 September 1945. On my recent trip to the West Coast I inspected all of these parcels and discussed settlement of termination claims with representatives of the lessor. In this memorandum I am furnishing you with a brief statement of my observations and making certain recommendations concerning the disposition of all our obligations under both leases.

2. Since it commenced to occupy parts of Catalina Island for training purposes, commencing in December, 1943, OSS has made substantial expenditures for permanent improvements to the leased premises. The bulk of these expenditures was for barracks and other buildings used to quarter OSS personnel on the island. The cost of these buildings was considerable, primarily because it was necessary in each instance to transport materials and workmen from the mainland. Other expenditures were necessary to adapt the existing leased premises to the training needs of OSS; for example, the pier at Toyon Cove was extended and lengthened, cement driveways were added, existing plumbing and refrigeration facilities were improved, and so forth. It appears that all these expenditures were deemed necessary and proper at the time they were made, and that proper authorizations were received within the agency before work was commenced.

3. In arranging the closing up of the premises, Lt. Cols. Johnson and Allen have given orders for the removal of all property installed by OSS and removable without substantial injury to the premises except where the cost of removal exceeded the salvage or other value the property might have to the Government. This, I found, had been substantially done, with one or two exceptions noted below. All furniture and furnishings, and all fixtures such as stoves, refrigerators, sinks, bowls, showers, fluorescent lighting fixtures, etc., provided or installed by OSS had been removed

for the most part, turned into surplus property channels disposal. The exceptions were at two installations which normally leased without rental charge by the Santa Catalina land Company to charitable organizations. In those areas, SS had erected barracks which will be usable by the organizations in question. Col. Johnson and Col. Allen both felt that the few plumbing fixtures installed in those barracks might be left behind. In all other instances, however, such fixtures were removed.

4. You will recall that some time ago we discussed ways and means of realizing maximum returns on the barracks and other buildings erected by OSS. With your consent, I suggested to Col. Johnson that he arrange to get bids for the salvage value of the lumber and other materials in the buildings. I found that several local dealers had submitted lumber and other materials in the buildings. I found that several local dealers had submitted bids with somewhat disappointing results. While I do not have the exact figures before me, Cols. Johnson and Allen and I computed that the net gain to OSS on the best bid would be about $100 at Toyon Cove. While concededly the lumber and other materials have a real value, the buildings would have to be dismantled and transported to the mainland. The high labor costs involved in these operations were undoubtedly the principal reason for the low bids received. Under the circumstances, Cols. Johnson and Allen felt, and I agreed, that the removal of the buildings would, in the long run, prove disadvantageous and uneconomical to the Government. Even though bids were submitted on the basis that the contractor would have to restore the areas from which the buildings were removed, it could be anticipated that arguments would develop with the lessor as to whether restoration was done properly. Furthermore, all OSS personnel were leaving the island on 30 September or within one or two days thereafter, and it was obviously preferable that matters be settled as finally as possible prior to their departure.

5. The leases in question, OSS-1090 and OSS-1105, provide that the Government may be required to restore the leased premises within sixty days after receiving notice from the lessor to do so, and if it does not do so, the lessor can restore and charge the Government with the cost. The lessor here, to protect its rights in this respect, has already given us notice that it will require restoration. At the same time it has indicated its willingness to accept the improvements made by the Government in lieu of restoration, but it has refused to pay anything for such improvements. At a meeting

DECLASSIFIED
Authority NND 51251

held on Tuesday evening, 25 September, at the home of Mr. H. S. Slaugh, Vice President of the lessor, between Mr. Slaugh and Mr. W. J. Scott, Assistant Secretary of the lessor, and Col. Allen, Lt. Dethlefson of the San Francisco office, and myself, Mr. Slaugh said that the buildings erected by OSS were of no value to the Santa Catalina Island Co. All of them, he pointed out, were of temporary construction and of a design for the most part unsuitable for use by the lessor. He conceded that the materials contained therein had some value on the island, but he said that the company was not planning any construction and had no need for any such materials at this time. He also admitted that some of the other improvements (e.g., the extension of the pier at Toyon, and the cement walk and roadway) enhanced the value of the land, but he said that they were not necessary to the premises, and the lessor could not be expected to share any part of the cost. The one thing which he acknowledged to have some value to the lessor was four boilers installed by OSS on two of the parcels. If these were left installed, he said the lessor would allow $400 for the boilers, to be applied either against the rent or against the lessor's claim for damages to the interior of the buildings at Toyon. Mr. Slaugh was well aware of the strength of his bargaining position, and when we endeavored to press him on these items he replied that it would be perfectly satisfactory to the lessor if the Government removed all of its improvements and restored the premises.

6. In the course of our discussion Mr. Slaugh made it plain that we could not agree on a final settlement at that time because he had not yet had an opportunity to inspect the interiors at Toyon (before the war a boys' school, with buildings reported to have been in good condition at the time we began occupancy). Mr. Scott suggested that the allowance on the four boilers could be set off against the cost of repainting and replastering the interiors at Toyon. I replied that I had carefully gone over all the buildings, that I believed them to be in good condition, and that I saw nothing with one or two exceptions which would not be regarded as fair wear and tear. Mr. Slaugh pointed out that under the lease the Government had an affirmative obligation to keep the premises in a good state of maintenance and repair. I replied that I felt we had done so, and that we had no intention of repainting or replastering the interiors except in any case where it appeared that actual damage had been caused the premises by our acts or omissions.

7. On Thursday, 27 September, after I had left the Island, Mr. Slaugh and other representatives of the lessor inspected the interior at Toyon, according to word I subsequently

DECLASSIFIED
Authority NND 51251

ceived from Col. Allen. The latter wired me in San Francisco that as a result of their inspection they were willing to accept all improvements erected by the Government in their present condition (i.e., with all fixtures and property, except piping, removed); that they would not require us to do any restoration of any kind, either exterior or interior; and that the lessor would pay us or credit us with $200 on account of the four boilers we are leaving in the premises. I wired in reply to Col. Allen that I would take this offer back to Washington with a recommendation that it be accepted.

8. It should be understood that this disposition of the matter is by no means beneficial to the Government, as our substantial capital outlay in these properties is being largely wiped out. Our trading position is poor, however, because whatever value is to be found in these building materials is largely nullified because of their inaccessible location. It can also be understood that these improvements are of little direct benefit to the lessor, and Mr. Slaugh was apparently sincere when he said that it was no concern to the lessor whether we left the buildings or removed them and restored the premises to their former condition. Under the circumstances, in view of the enormous cost which would certainly be involved in removal and restoration, we would seem to have no alternative other than to do what the Coast Guard did when it surrendered the Isthmus property on the island earlier this year: turn the buildings over to the owner of the land, and write off the expense as a cost of war. Furthermore, it is certainly true that Mr. Slaugh would present a larger claim than $200 for restoration of Toyon and the other properties if we were to remove all improvements. At Toyon alone, for example, half a dozen or more partitions separating small rooms were knocked down to form one large room, and some other structural changes were made which could hardly be termed ordinary wear and tear. There is no doubt that $200 for interior restoration is considerably less than our total liability therefor.

9. Under all the circumstances, therefore, I recommend acceptance of the lessor's offer as constituting the most economical and advantageous bargain available to the Government. Please let me have your views immediately, as I promised Mr. Slaugh an answer within ten days. If you wish, this office will be glad to assist in the preparation of a supplemental agreement with the lessor.
